02 / LIVE PRODUCT

AI Voice Receptionist

Vyom's flagship enterprise product provides 24/7 inbound reception, multi-provider triage, appointment scheduling, lead qualification, and intelligent outbound patient or client campaigns.

Real-Time	+42%	100%
Conversational audio stream	Appointment booking conversion	After-hours calls answered

Capabilities

- Natural interruptions: the agent stops speaking immediately and adjusts context without stuttering.
- Bidirectional calendar, EHR, CRM, and custom SQL synchronization.
- Native fluency in 45+ languages, including English, Hindi, Hinglish, Spanish, French, German, and Mandarin.
- Telephony integrations across Twilio, Asterisk, SIP trunks, and WebRTC.
- 15+ concurrent calls per business line with zero hold times.
- SOC-2 Type II infrastructure, HIPAA-compliant PHI routing, and TLS 1.3 audio encryption.

Key integrations

Google Calendar, Microsoft Outlook, Cal.com, Dentrix, Epic, AthenaHealth, Salesforce, HubSpot, custom SQL databases, Twilio, Asterisk, SIP trunks, and WebRTC.

Business impact

- Eliminates missed after-hours calls and preserves demand outside office hours.
- Can replace up to three receptionist phone-desk shifts, or approximately 120 manual phone hours per month.
- Designed for clinics, legal intake, real estate inquiries, dispatch, customer support, and inbound demo scheduling.

03 / PROPRIETARY PRODUCT

Autonomous Workflow Orchestrator

A next-generation self-healing RPA engine for browser and desktop workflows. It is designed to replace brittle legacy scripts with visual state understanding, semantic selector recovery, and embedded compliance verification.

99.8%	180+	300%
Auto-healed recovery uptime	Manual hours saved per month	Resilience improvement vs legacy

Technical architecture

- Visual neural embeddings and Playwright inspect DOM hierarchies without depending on fragile selectors.
- Semantic vector likeness identifies replacement targets when portals, ERP screens, or CRM layouts change.
- An embedded AI compliance and audit agent verifies documents, invoices, cryptographic tokens, and state transitions.
- Sandboxed execution harnesses test actions before production database mutations.
- Multi-agent orchestration supports contract processing, ERP reconciliation, and other complex workflows.

Stealth R&D pipeline

- Vyom Finance Agent: accounts payable, 3-way purchase order matching, invoice reconciliation, and ledger verification.
- Vyom Finance Workforce: payroll validation, cash-flow forecasting, anomaly detection, and financial operations.
- Vyom Lawsuit: contract analysis, discovery audit, clause risk scoring, and regulatory verification.
- Vyom PolicyLens: live analysis of SaaS terms, privacy policies, and compliance changes.
- Vyom SafeBrowse: secure browsing, DLP enforcement, DOM sandboxing, and malicious payload blocking.

Status: waitlist-only and undergoing SOC-2 compliance sealing.

04 / AUTONOMOUS GROWTH LOOP

The Vyom AI ecosystem

Vyom connects customer conversations, operational systems, reputation signals, and AI search visibility into a continuous growth flywheel.

01

AI Voice Agent

Converses with callers, qualifies leads, books appointments, and routes high-intent demand.

02

Custom CRM / Web / Desktop Apps

Logs transactions, synchronizes operational data, and passes completed service records forward.

03

Google Review AI Agent

Triggers personalized SMS or WhatsApp follow-ups, intercepts dissatisfaction, and harvests stronger reviews.

04

AIEO

Uses review momentum and Knowledge Graph schemas to improve recommendations in ChatGPT, Perplexity, and Gemini.

Infinite loop

High-intent buyer inquiries flow back into the voice agent, creating an autonomous revenue engine with compounding operational and search visibility gains.

Expected outcomes

- +42% appointment booking conversion benchmark for the voice agent.
- +300% five-star review acquisition benchmark through automated follow-up.
- +310% AI buyer recommendation benchmark through AIEO programs.
- Zero incremental ad spend required for the flywheel to keep improving once the operational data loop is active.

05 / PRICING

AI Receptionist plans

Pricing is transparent and has no hidden setup fees. Direct carrier telephony is available as an add-on within each tier.

Starter

INR 14,999 / month web voice; INR 17,499 with telephony

- Up to 400 verified calls per month
- 1-2 provider or doctor routing
- Hindi, Hinglish, and English
- Clinic knowledge base integration

Professional

INR 23,999 / month web voice; INR 26,499 with telephony

- Up to 700 verified calls per month
- Up to 5 doctor or provider routing
- Rescheduling workflows
- Call recording and real-time analytics

Enterprise

INR 33,990 / month web voice; INR 36,490 with telephony

- 1,000+ calls per month; scalable to 2,500+
- 10-15+ doctors and multi-department triage
- Custom CRM connectors
- Dedicated solutions architect and 24/7 priority SLA

ROI benchmark

A human receptionist desk operating 24/7 across three rotating shifts can cost approximately INR 75,000-120,000 per month. Vyom is benchmarked at 4.2x-7.8x net ROI in the first 30 days by reducing direct labor overhead and recovering calls that would otherwise be lost after hours.

06 / SERVICES

Enterprise engineering services

01 Self-Healing RPA & UI Automation

Visual automation with Playwright and vision models; 99.8% auto-healed uptime.

02 Multiagent Systems

Supervisor-worker swarms for complex planning, execution, evaluation, and verification.

03 Agent to Agent (A2A) Protocols

Secure peer-to-peer agent meshes and standardized JSON-RPC coordination.

04 Custom CRM & ERP Software

Bespoke operational dashboards, data pipelines, and native agent connectors.

05 Websites & Web Applications

High-performance web platforms with conversational voice and telemetry.

06 AIEO

Knowledge Graph structuring and schema injection for AI search visibility.

07 Enterprise RAG Chatbots

Hybrid vector search, reranking, and contextual memory for internal knowledge.

Representative technology

Next.js, React, TypeScript, Python, Playwright, LangGraph, CrewAI, Temporal.io, OpenAPI, JSON Schema, Model Context Protocol (MCP), Pinecone, Qdrant, ChromaDB, FAISS, Weaviate, pgvector, Redis, Claude, GPT-4o, Gemini, Groq, LangSmith, Langfuse, Ragas, DeepEval, Salesforce, HubSpot, SAP S/4HANA, QuickBooks, Twilio, WebRTC, and Google Workspace.

07 / SECURITY AND DELIVERY

Built for controlled autonomy

- Harness engineering: every agent process runs inside a sandboxed test harness that evaluates state transitions before production changes.
- Deterministic guardrails: strict input and output schemas, policy boundaries, rollback logic, and runtime verification.
- Zero data retention: ephemeral execution memory means proprietary client IP and customer data are not stored or used to train public models.
- Certified compliance posture: SOC-2 Type II infrastructure, HIPAA-compliant healthcare appointment routing, GDPR compliance, and 256-bit TLS encryption.
- Role-based access control: granular permissions prevent agents from acting outside approved scopes.

Discovery to production

30 min	48 hrs	2-4 wks
Architectural discovery call	Live telephony prototype	Production pilot sprint

- Discovery: architectural audit, use-case mapping, and live proof-of-concept demonstration.
- Prototype: telephony or workflow prototype delivered within 48 hours under mutual NDA.
- Sprint: architecture review through production pilot in approximately two to four weeks.
- Ownership: client receives ownership of delivered code, configurations, and fine-tuned models.

Engagement fit

Vyom is a strong fit when a business needs reliable automation across changing interfaces, wants to reduce repetitive operational labor, or needs an AI workforce with clear safety boundaries and measurable business outcomes.

08 / INDUSTRY SOLUTIONS

Vertical solution blueprint

Healthcare, Dental & Medical

24/7 patient calls, HIPAA-compliant booking, Dentrix/Epic/AthenaHealth integration, WhatsApp reminders, and AIEO for local discovery.

Legal & Law Practices

Client intake, conflict screening, consultation scheduling, court-portal evidence extraction, and custom legal CRM.

Real Estate & Property

Buyer and tenant inquiries, showing appointments, MLS listing automation, review harvesting, and local search visibility.

Finance, Accounting & Wealth

Client onboarding, tax-season triage, ERP platforms, ledger reconciliation, BI dashboards, and financial agent swarms.

Logistics, Supply Chain & Field Services

Driver dispatch, emergency routing, shipment status triage, bills of lading, and freight reconciliation.

B2B SaaS, E-Commerce & Tech

Demo scheduling, VIP support escalation, A2A protocols, collaborative swarms, web applications, and AIEO.

Contact and next step

Start with a 30-minute discovery call to map one high-value workflow, identify the integration surface, and define a measurable pilot. The live website is the primary engagement point: https://vyom-agents.vercel.app

VYOM AGENTS
